# ASHIKODI EMEKA

ashikodiemeka@gmail.com | linkedin.com/in/ashikodiemeka | github.com/ashikodes

Software developer with a focus on building user interfaces with JavaScript and its surrounding technologies. Other skill sets include designing application mockups, transforming mockups to code and maintaining large code base.

## EDUCATION

**Delta State University, Abraka. | November 2012**                                    **GPA: 3.98**
*B.Sc. Computer Science*

## WORK EXPERIENCE

**Software Engineer II. | The Zebra**                                                **Jan 2017 – present**
Worked with the **marketing team** on pages that are optimized for search engines.
- Made use of SEO best practices to improve pages and site performance.
- Worked with Django framework for content creation/management.
- Worked closely with the designer for the site revamp.
- Added animation features and fixed UI bugs.

Moved to the **consumer team** to work on our core product.
- Implemented several integrations with partner's API
- Worked with our data pipeline system to implement user event tracking
- Leverage Google Tag Manager for product analytics
- Continually worked with ReactJS to maintain the product and add features.

**Frontend Developer. | Access Mobile Inc**                                          **Dec 2015 – Nov 2016**
- Worked on a project that manage in-house operations of healthcare facilities.
- Using EmberJS, I Built an app that allow users find nearby healthcare providers.

**Software Developer. | Andela**                                                     **Mar 2015 – Mar 2019**
Andela invests in Africa's talented developers and integrates them into the world's best tech teams.
- I went through Andela's code bootcamp.
- Participated in a hyperlocal hackathon with colleagues
- Led a team in a project to build an event management app.

***FREELANCING***
As a way to improve my coding skills, I freelanced for some startups.
**Datawerx**, Annapolis.                                                             **Aug 2018 - Apr 2019**
*Ember/ReactJS*
Helped fix issues on the freshleads app and revamped the HealthPlanUsa project.

**Dukstra**, Cape town.                                                              **Jan 2018 - May 2018**
*EmberJS*
I assisted the founder with a project that needed to be out quickly.

**CommonCode**, Melbourne.                                                           **July 2017 - Jan 2018**
*Meteor/ReactJS*
Added more features to the meerqat and parlourgigs project

**Sciensa,** São Paulo.                                                              **July 2016 - Mar 2018**
*EmberJS*
I worked with the Sciensa team to execute projects for clients like CVC and Gerdau
